claim 16 renumbered as claim 18.

Response to Arguments

3. Applicant's arguments, see pages 11-14 under Applicant's Remarks, filed on 07/03/2006, with respect to claims 1-16 have been fully considered and are persuasive. The rejection of claims 1-16 has been withdrawn.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Art Unit: 2611

4. Claim 1 is allowable over Rosengren et al. (US Patent 5,633,683) reference because Applicant correctly point out on page 12 that Rosengren et al. does not teach "a second encoder that is configured to provide a plurality of encoded sub-sampled video signals, each coded sub-sampled video signal corresponding to each input video signal".

5. Claim 2 is allowable over Rosengren et al. (US Patent 5,633,683) reference because Applicant correctly point out on page 12 that Rosengren et al. does not teach "a transcoder that is configured to supply a plurality of coded sub-sampled video signals, each coded sub-sampled video signal corresponding to each coded video signal".

6. Claim 3 is allowable over Rosengren et al. (US Patent 5,633,683) reference because Applicant correctly point out on page 12 that Rosengren et al. does not teach "a de-multiplexer that is configured to de-multiplex an input video signal to provide a plurality of coded video signals and a plurality of coded sub-sampled video signals corresponding to the plurality of coded video signals" and "an image compositor that is configured to create a mosaic from a select group of sub-sampled video signals selected from the plurality of coded sub-sampled video signals based on a user request and the data descriptors".

7. Claim 10 is allowable over Rosengren et al. (US Patent 5,633,683) reference in view of Ito et al. (US Patent 6,377,309) because Applicant correctly point out on pages 13-14 that Rosengren et al. does not teach "a plurality of secondary video signals coded in accordance with an MPEG-4 standard, each secondary video signal being obtained successively by sub-sampling and encoding each primary video signal".

8. Claim 11 is allowable over Rosengren et al. (US Patent 5,633,683) reference because Applicant correctly point out on page 12 that Rosengren et al. does not teach "supplying a plurality of coded sub-sampled video signals, each sub-sampled video signal corresponding to each input video signal".

9. Claim 12 is allowable over Rosengren et al. (US Patent 5,633,683) reference because Applicant correctly point out on page 12 that Rosengren et al. does not teach "supplying a coded sub-sampled video signal from each coded video signal".

10. Claim 13 is allowable over Rosengren et al. (US Patent 5,633,683) reference because Applicant correctly point out on page 12 that Rosengren et al. does not teach "generating a plurality of coded sub-sampled video signals from the input video signal, each coded sub-sampled video signal corresponding to a sub-sampling of each coded video signal, a data descriptor being associated with each sub-sampled signal that characterizes the coded video signal".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Oosterhout et al. U.S. Patent 6,405,371 B1 discloses "Navigating Through Television Programs".
